INDUSTRIAL VISIT

On **April 27, 2023**, a group of third-year BCA students went on an industrial visit to **Cyberverse Foundation** in Mysuru. During the visit, the students were educated about the significance of cyber security in today's world and how it functions. They were informed about the roles of defenders and attackers in cybercrime and the vulnerabilities in digital connections, emphasizing the shift from traditional to modern techniques heavily reliant on the internet.

The students were advised to be cautious when sharing sensitive information such as OTP, Aadhar numbers, debit/credit card details, and location access. They were also encouraged to frequently change their passwords using unique words. The visit included demonstrations of AI and cyber security lab setups, along with explanations about various types of cyber security and their importance. Real-time examples, such as the hacking and ransom of AIIM's hospital by hackers, were provided to illustrate the potential risks.

The importance of making cyber security a compulsory subject in all colleges was emphasized, and the need for an official government amendment to enforce this was discussed. The students were made aware of the vast opportunities and requirements for employees in the field of cyber security. The industrial visit was coordinated by Ms. Savitha KV, Assistant Professor & Head of the Department of Computer Science at Hindustan College. 29 students had visited, gained valuable knowledge and insights into the field of cybersecurity for the 29 participating students.
